WEDDING VEILS

BY ABRAZI

Introducing our very first collection of wedding veils, created for both the modern and classic bride. Each veil is designed and developed in the Netherlands by designers with over 20 years of experience, and handmade in Italy with Venetian tulle.

The collection itself is manufactured on a small scale in a family-owned atelier – run by women – who understand their craft like no other. Each veil is cut to size with precision and hand-finished with double-sided pearls and crystals, metal edges, different shades of wool and Swiss lace.

Since putting together a bridal look is all about creating a coordinated ensemble, our veils are specifically designed to match different types of bridal jewelry and wedding gowns. By incorporating metal tones like gold, rose gold and silver – as well as pearls and crystals – into the finish of the veils, brides have the opportunity to perfectly coordinate their look.
